

# Advanced Technology Solutions

The latest technology can make independent living and everyday tasks so much easier, especially if you have limited mobility.

The Rocky Bay Advanced Technology Solutions program employs qualified professionals to match your individual needs with the right technology solutions.

Not only can technology give you independence, it can also improve your quality of life.

Rocky Bay's qualified specialists will meet with you in person or over the phone to understand your needs and goals and prescribe or recommend appropriate technology devices to suit your lifestyle.

We will support you with setting up and configuring technology specific to your needs, and look at ways to integrate it with other equipment in your home.

As your needs change over time, we can provide ongoing support to ensure that your technology continues to work for you.

We can also provide training in the use of your assisted technology for yourself and others who may support you.

We will work with your therapist, support worker or family to help you achieve your goals and take the next steps towards more independent living.
