

# Milo Social Skills Therapy

Milo is a humanoid robot with an evidence-based curriculum designed to help children living with autism spectrum disorder (ASD) to navigate social situations, learn emotional cues and develop self-regulating behaviours.

Using Milo can transform the way children engage with others, helping to improve relationships with family members and peers.

## Why is Milo so effective?

Milo:

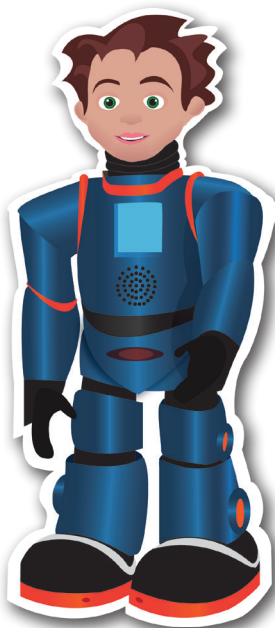

- is fun and engaging for children
- demonstrates a full range of emotion using facial expressions
- is always consistent
- never gets tired
- never gets frustrated

*“Jade was never overly enthusiastic about going to speech therapy, but she was more than delighted to spend time with Milo.”*

Kerry, Jade’s mother

## Benefits of Milo Social Skills Therapy

- Milo is highly engaging, fun and motivating, making him an effective tool in teaching social skills to children
- By developing greater social awareness, children learn to make sense of their interactions with others, which often helps to reduce their social anxieties
- Children learn to recognise when they are feeling upset and develop a range of calm down techniques provided by Milo
- With improved social understanding and communication skills, children become more confident and capable of navigating social situations

## Who is eligible for Milo Social Skills Therapy?

Milo delivers results for school-aged children with ASD. He is also suitable for children and young adults with a range of diagnoses who could benefit from assistance in developing social skills.
